

PedLLS Outcomes Lab CROSSWORD

ACROSS:

4. Who the PedLLS Lab studies to learn about language growth.
6. What children use to share their thoughts, ideas, and feelings.
9. The way we share ideas with others by talking, gesturing, or writing.
10. The sense that helps us listen to speech and sounds.
11. All the words someone knows and uses.
16. What happens when we gain new knowledge or skills.
17. A group of people working together toward one goal.
18. The information collected in research.
20. Help or guidance given to someone.
23. A research project that looks for answers to important questions.
24. The results or findings from a study.
26. The group of people who know a child best and help them grow.
27. A safe scan that takes pictures of the brain.
28. The name of our lab — short for Paediatric Language Learning and Speech Outcomes.

DOWN:

1. The part of the body that helps us think, talk, and learn.
2. Paying attention to sounds and words people say.
3. A focused piece of research with a goal and plan.
5. A way to see pictures of the brain to understand how it works.
7. A place where people study and do research after high school.
8. The way children grow and learn new skills over time.
12. The building blocks of language.
13. A fun and important way young children learn.
14. A person or family who joins a research study.
15. What we do to share ideas with words.
19. The sounds we make with our mouth to form words.
21. A young child between about one and three years old.
22. Careful investigation to learn new information.
25. A way of learning through observation and experiments.
29. A place where research happens and discoveries are made.
